Who We Are

Finishing Technologies is the leader in the finishing equipment industry. We have exclusive accounts with numerous industrial suppliers and specialize in complete finishing solutions. We pride ourselves in being the largest full-service technical finishing equipment distributor in the Pacific Northwest. Through exceptional service, superior product-lines, and a knowledgeable staff, you can rely on Finishing Technologies to provide quality products, innovative solutions and world-class service and repair for your equipment.

Our Industries:

AEROSPACE

With 25+ years of experience in the aerospace-finishing industry, we're the experts. From HVLP guns and electrostatic equipment, to automated systems and robot applicators, we offer the latest technologies, methods and solutions based on solid application experience and a thorough background of the options.

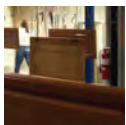

TRANSPORTATION

With 40+ years of experience in the transportation industry, we offer the latest technologies and solutions. Finishing Technologies has the expertise and product knowledge to solve your most complicated finishing challenges while still maintaining a Class-A finish.

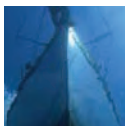

METAL FINISHING

Finishing Technologies offers the full spectrum of finish-application solutions for all powder and liquid coatings, ensuring that our customers achieve a high quality, smooth finish.

WOOD FINISHING

Whether you are applying a stain, varnish or pre-catalyzed lacquers/sealers to cabinets, doors, windows or furniture, Finishing Technologies provides the latest equipment and techniques to achieve world-class results.

MARINE

If you are coating ships, subs, barges, boats or recreational vehicles, the coatings you use each present unique challenges; let us be the solution.

MILITARY

Finishing Technologies specializes in equipment specially geared to apply the latest high-solids protective coatings like plural-component epoxies, urethanes and CARCs.

"Quality brands, knowledgeable staff"

Our Products:

Finishing Technologies provides a variety of finishing equipment, industrial supplies and finishing systems. We proudly represent quality brands, such as Binks and Devilbiss, Gema, Graco, 3M, Sata, Ransburg, Columbus Industries, Anest Iwata, Nitrotherm, Empire Abrasives, Daifuku Webb and many more.

PAINT FINISHING EQUIPMENT

From paint guns to pressure tanks, pneumatic and electric pumps and accessories, paint hose and parts to electrostatic equipment, airless and air-assisted airless guns and pumps, and everything in between, we're the leader in the Pacific Northwest for all your finishing equipment needs.

POWDER COATING EQUIPMENT

We proudly represent Gema, the world leader in powder coating equipment. With the highest first pass transfer efficiency, short color change times and low maintenance costs, Gema and Finishing Technologies offer everything you need to achieve superior productivity in your powder coating production line.

PLURAL COMPONENT EQUIPMENT

Today's two- or three-component coatings have very precise mix ratios. Many painting departments "hot pot" their materials, which can make it difficult to get a consistent mix-ratio from batch to batch. By utilizing electronic or mechanical plural-component equipment, you can remove the guesswork to ensure consistent and accurate mix-ratios and dramatically reduce your waste stream.

BLAST EQUIPMENT

Whether you need a small blast cabinet or a large blast booth for cleaning and preparing parts for painting, Finishing Technologies has what you need. We provide pneumatic blasting cabinets, nozzles and supplies from Empire Abrasives and custom equipment from Safe Systems.

NITROTHERM-SPRAY

We are the exclusive distributor on the west coast for Nitrotherm. This system replaces traditional filter-compressed air with up to 99.5% nitrogen-enriched air, which is clean, dry and ionized. Increase your production up to 40%, save 25% on materials and reduce solvent use too. Increase production by 50-100% by reducing application time, as well as eliminating common finish problems like mottling and orange-peel.

COMPLETE FINISHING SYSTEMS

From concept and custom CAD design to engineering, installation, permitting and fabrication, we are the most experienced systems integrator in the Pacific Northwest. Trust Finishing Technologies with your paint booth, pre-treatment systems (washers and/or blast systems), conveyor systems, paint kitchens and drying/curing enclosures or ovens. We offer complete turnkey installation, including utility connections, custom controls, permitting services, startup and training, and service, repair and troubleshooting of your system after install.

"We have built our reputation on integrity, flexibility and a personal approach to business."

f, complete turnkey service."

Finishing
Technologies

Finishing Technologies provides the latest advancements in finishing-related solutions, bringing to the forefront new technologies that reduce waste and emissions into our environment. We provide unparalleled partnerships with our customers, providing goods and services worldwide.
